

Do you or someone you know:

- Have a background in health care research, policy, and/or systems?
- Have experience with evidence-based policy making?
- Have an interest in shaping the future of healthcare research in NB?

If so... The New Brunswick Institute for Research, Data and Training (NB-IRDT) invites you to join the Maritime Strategy for Patient Oriented Research (SPOR) SUPPORT Unit (MSSU) Provincial Steering Committee!

What are we doing?

The Maritime SPOR SUPPORT Unit works to improve the lives of New Brunswick citizens by bridging the gap between patients and researchers through Patient Oriented Research. This patient-centric method engages patients as partners in directing health care research that is relevant and important to them. The MSSU Provincial Steering Committee provides oversight and guidance to MSSU operations in NB, including setting research priorities, allocating funding, and networking with GNB and other stakeholders.

How can you help?

If you have a background in healthcare and policy making and have an interest in supporting Patient Oriented Research in NB, we invite you to reach out to discuss this opportunity further!

We look forward to hearing from you!
